The Tale of Sir Basil

Long ago, when dragons roamed the world, the country was in need of a great knight. So it was that the bold Sir Basil came forth, clad in shining metal, to do brave exploits across the land. Far and wide his daring acts were told until the sad day when his shining sword began to fade and he hung up his shield. By far his most daring deed was the rescue of the fair Princess Gwendoline from the wicked she-dragon, Grymbol.

Fair Gwendoline had been picking flowers in the woods with her maid when the evil Grymbol sneaked up and carried her off in her powerful claws. Grymbol took Gwendoline to her freezing cave on top of Mount Gobble. Terrified, Gwendoline expected to be eaten at any moment but instead the evil Grymbol made her dance and sing constantly, until Gwendoline sobbed with exhaustion.

Luckily, brave Sir Basil heard her singing and crying from the bottom of the mountain. Leaving his horse Firesmoke tethered to a pine tree, he made his way up the mountain to the cave and challenged the dragon to a fight. They battled hard for days. The dragon blew huge gusts of smoke and fire all over Sir Basil until his armour was quite melted. But he never gave up, even when his sword was flicked from his hand by the dragon's mighty tail and tossed down the mountain. Finally he managed to plunge his hand into Grymbol's mouth. He shook Grymbol's head until the beast's eyes rolled and the dizzy creature fell over.

Sir Basil smacked Grymbol on the nose and said, 'I am brave Sir Basil. From this day on you will never leave the mountain top. If you dare to, you will feel the tip of my sword in your heart. This day I have spared your life. Next time you will not be so lucky!' Taking the fair Gwendoline in his arms, Sir Basil staggered down the mountain to where Firesmoke waited, and he took the Princess home.

The name of Sir Basil is sung far and wide; but it is sung most often in the castle where fair Gwendoline thinks fondly of her saviour.

Questions

Answer the following questions with a full sentence:

- What is generally thought to be Sir Basil's most daring deed?
to rescue the fair princess

To persuade Mrs Potter to let us have a pond in the school grounds

Dear miss potter we would like to know if we could have a pond in the wasted space by the library see exit? The hole close off 20 children in pens and a big class there all being you. We would be very safe because there's lots of class safe around the area.

There are three reasons why we will be safe because we have pets, fence, and lots of class fences. This will make people and governments to come and look at our school. We have space we do not need and seriously need to use the space.

IT also makes a nicer environment for the entire school. It goes with saying people will live there more and more. I like some of the laws I've seen on other schools and environments, we can even build duck houses for the pond in it and it.

Conclusion Conclusion can not

Adult scribe - Portaged hand.

If you can't pay the money, then in the future, we should surely have enough money for the school's new pond. Also, parents and carers should definitely like their children working outside to improve their learning. So please Mrs Potter, can we have an outstanding pond in the wasted space outside of the library?

A great conclusion.
